“ 1946 - 2026
80 YEARS OF
CREAMINESS
AND SMILES”

WE ARE SAMMONTANA ITALIA SOCIETÀ BENEFIT

Our company was founded and has grown through the determination and passion of those who believed in the dream of transforming their lives and shaping a brighter future.

We recognise our **responsibility to both current and future generations**. That's why we are committed to meeting today's most significant challenges - so that tomorrow, we leave behind a planet where new projects and dreams can thrive.

Building a **better future** means making a commitment today to generate lasting value for the communities, individuals, environment, and regions we serve every day. For many years, we have designed and developed our products and activities with a focus on sustainability - always aiming to nourish the future of new generations with a Smile.

Our journey - along many different paths - has brought together a variety of entrepreneurial stories, all united by a shared vision of quality and the future. Today, this shared vision unites us as a single organisation.

SAMMONTANA ITALIA S.P.A. SOCIETÀ BENEFIT

is a large group and a **legal structure that consolidates our ethical, responsible, and transparent approach to business**. At the same time, it marks the beginning of our future-focused vision.

We work together to pass on what we have received from those before us to the generations yet to come.

Alessandro Angelon

Chief Executive Officer at
SAMMONTANA ITALIA S.P.A. SOCIETÀ BENEFIT

STARTING FROM JANUARY 2026, ALL OUR BRANDS WILL BELONG TO SAMMONTANA ITALIA S.P.A. SOCIETÀ BENEFIT

WHAT IS A SOCIETÀ BENEFIT?

This is a business legal form introduced in Italy in January 2016 (the first Country in Europe to do so).

It is a model that requires companies to include in their Articles of Association, not only business purposes, but also objectives of **common benefit**. This is with the aim of **creating value** for the community, people, environment, and regions in a **responsible, sustainable, and transparent way**.

HOW DOES A COMPANY BECOME A SOCIETÀ BENEFIT?

By amending the company's Articles of Association to clearly set out its commitment to conducting business according to a responsible, ethical, and transparent model.

WHAT DOES IT MEAN TO BE A SOCIETÀ BENEFIT?

It means making a concrete commitment to have **a positive impact on society and the planet**.

Società Benefit organisations are required to prepare an annual impact report. This should outline progress toward the specific objectives set out in their Articles of Association, describing both actions taken as well as plans and commitments for the future.

WHY DID WE CHOOSE TO BECOME A SOCIETÀ BENEFIT?

Because we believe our company's mission should be driven first and foremost by social purpose, and not only by economic goals.

OUR COMMITMENT

As a Società Benefit, Sammontana Italia is committed to conducting business profitably while also generating tangible benefits for society. The company operates with responsibility, sustainability, and transparency, ensuring that it acts in the best interests of people, the local community, the environment, and all stakeholders.

Ensuring the company's future depends on economic sustainability - which is meaningless unless it is supported by environmental and social sustainability as well.

Becoming a Società Benefit is a journey based on daily commitments, where Sammontana Italia's efforts play an important part. However, real, tangible results can only be achieved with everyone's active support and cooperation, recognising that positive impact is maximised when pursued together.

**SAMMONTANA
ITALIA**
È UNA SOCIETÀ
BENEFIT

SAMMONTANA Sustainability

2016

Voluntary agreement

Sammontana signs a voluntary agreement as part of the Italian national programme for environmental-footprint assessment with the Ministry of the Environment, undertaking to measure and reduce, whenever possible, the environmental footprint of its products.

2017

Conscious-School Project

Over 2,000 primary schools involved in three years' teaching syllabus.

Clean beaches

Over 50 Italian beaches cleaned up by Legambiente (Italian environmental association) & Sammontana.

2018

Planning

A special software programme predicts the environmental impact of the various available options.

Beachfront resorts/café

Sale outlets selected on the basis of their environmental-sustainability credentials:

- Highly "energy-efficient" fridges;
- Offsetting gelato sold during the season.

2019

Circularity index

Commitment to waste reduction, both in terms of raw materials and packaging.

100% Multipack containers in recycled paper

Place to be saved

Italia intatta (Untouched Italy) | 2019 Tour | Mario Tozzi.

2020

Barattolino Delizie range & Barattolino Specialità range

produced with a lid and tub in fsc®-certified cardboard.

In 2020 Sammontana made the decision to dedicate its experience and expertise to the environmental cause and take concrete action for the furtherance of sustainability with a three-pronged approach:

HEALTH & WELL-BEING

Human beings, their health, right to food, to food security, and satisfaction and well-being.

SUSTAINABLE SUPPLY CHAINS

Sourcing feedstock/materials from suppliers with sustainability certification. Abiding by the principle of interdependence throughout the value chain.

ENVIRONMENT

Riduzione Reducing the environmental impact.

2021

Barattolino Classici Range

Produced with a lid and tub in FSC®-certified cardboard.

Sammontana renews the Agreement with the Italian Ministry for Ecological Transition extended it to the whole group.

2022

Sorbettiera range

Produced with over 50% bio-circular plastic.*

**It refers to plastic made from plant-based residues and waste. The use of these raw materials, as a substitute for fossil-based ones, helps reduce environmental impact. In the production of bio-circular plastic, the amount of plant-based raw material can be mixed with fossil-based raw material, in compliance with the mass balance principle. For more details on the mass balance, you can refer to:*

<https://www.iscc-system.org/certification/chain-of-custody/mass-balance/>

Regenerative Society Foundation

Sammontana enters the RSF as a founding member. The RSF is an organisation that unites the business world and the science community to accelerate the shift towards a completely regenerative society.

Environmental impact of products

Sammontana studies the environmental impact of 42% of its gelato production.

Renewable energy with Guarantee of Origin

Sammontana purchases 12% of its energy from renewable sources.

2023

Institutional Commitment to Sustainability

In 2023, Sammontana's institutional commitment to sustainability is formalised in the articles of association through its transformation into a Benefit Corporation. The five common-benefit purposes transpire the corporate mission, the three-pillar strategy and the concrete commitment demanded by the European Green Deal:

- Product and Communication
- Community and New Generations
- Value chains contribution to the sustainability
- Engaging with partners
- Decarbonisation

Environmental impact of products-ecodesign

Nel In 2023, Sammontana finished its studies on the environmental impact of all the gelato products. Sammontana is the first company in Italy that achieved the LCA Systematic Approach certification Sammontana implemented and certified an innovative Management System for the creation of LCA studies. On the one hand, it makes it easier to conduct this analysis on processes and product lines, and on the other hand, it reduces the time required for the assessment of environmental consequences and the degree of detail in both eco-design and environmental impact assessment of existing products or processes.

Renewable energy with Guarantee of Origin

Sammontana increases the amount of electricity it obtains from renewable sources, reaching about 20% in the year 2023.

Emission offsetting

Since the year 2016, Sammontana has offset over 180,000 tonnes of CO2 eq. for the Barattolino, Fruttiamo, Amando, Prima Ricetta & GreenGo ranges. In 2023 The equivalent CO2 emissions of the entire life cycle of the Amando line products are offset annually through the purchase of CDM (Clean Development Mechanism) certified carbon credits, which finance projects to reduce and remove CO2 in the atmosphere on a global scale. To calculate the equivalent CO2 emissions generated in the entire life cycle of the Amando line products, Sammontana annually carries out a study following the LCA methodology (Life Cycle Analysis, ISO 14044 standard).

2024

Institutional Commitment to Sustainability

Sammontana S.P.A. Società Benefit becomes B Corp certified.

Decarbonisation

Sammontana carried out and certified a Carbon Footprint of Organisation (CFO) study in compliance with international standard ISO 14064.

**It refers to the assessment of the total amount of CO2 and other greenhouse gas (GHG) emissions originating directly and/or indirectly from the processes performed by the organisation to perform its business activities.*

Renewable energy with Guarantee of Origin

For the production of its gelato, Sammontana purchased 100% renewable electricity certified by a Guarantee of Origin (GO). Of the organisation's total energy consumption, this share corresponds to 42%.

Supply chain of feedstock and materials

Sammontana keeps its commitment to source its supplies in an increasingly conscious manner, taking into account the social, economic and environmental impact. As from 2024, the Amando range vouches to promote sustainable farming practices across the almond supply chain of Sicily, through ISCC PLUS certification, according to the MASS BALANCE chain of custody.

2025

Decarbonisation

Based on the measurement of direct CO2eq. emissions, Sammontana has planned activities to progressively reduce them by taking action on processes and recipes.

Renewable energy with Guarantee of Origin

In 2025, for the production of its gelato, Sammontana confirms the willingness to purchase renewable energy certified by a guarantee of origin (GO). Of the organisation's total energy consumption, this share corresponds to approximately 65%.

Supply chain of feedstock and materials

As from 2025 the Amando range will enhance the positive and sustainable impact of the almond supply chain through the ISCC PLUS certification, according to the SEGREGATED chain of custody and, most importantly, through the definition of a Code monitoring impacts on biodiversity, GHG emissions, water consumption, circularity of resources, people and the "fair price" of engagement along the supply chain.

2026

Decarbonisation

Sammontana measures the carbon footprint of the entire organisation, a fundamental starting point for defining climate goals in line with the Science Based Targets initiative (SBTi). This commitment involves short-, medium- and long-term targets for achieving zero emissions, encompassing sustainability and the company strategy.

Renewable energy with Guarantee of Origin

The procurement of electricity certified with Guarantee of Origin (GO) is extended to the entire organisation. Currently, over 50% of purchased electricity comes from certified renewable sources, confirmation of Sammontana's tangible commitment to a responsible energy transition.

Partnerships

Sammontana has strengthened its circular sustainability through its partnership with Regusto, every year donating dozens of tonnes of food products that risk going to waste. Thanks to the blockchain, it has tracked every donation, generating a positive impact and supporting 8 non-profit organisations.

Supply Chain and Regeneration

The Almond Supply Chain project continues.

In collaboration with RSF, Sammontana measures its positive impact through an analysis based on 5 parameters: circularity of materials index, biodiversity, emissions, disclosure of good design practices and product LCAs, health and wellbeing of consumers.
