## AS FROM MAY 2023 SAMMONTANA SPA HAS BECOME SAMMONTANA SPA SOCIETÀ BENEFIT

### WHAT IS A BENEFIT CORPORATION?

A benefit corporation (società benefit in Italian) is a new type of business structure launched in Italy in January 2016 (we were the first country in Europe to do this).

The business structure requires the entity to include not only its business purpose in its articles of association, but also **its common benefit** purpose which must aim to **create value** for the Community, People, the Environment and the Territories in a **responsible, sustainable and transparent manner**.

### HOW DO YOU BECOME A BENEFIT CORPORATION?

By changing the company's articles of association and highlighting the fact that business affairs will be conducted in a responsible, ethical and transparent way.

### WHAT DOES IT MEAN TO BE A BENEFIT CORPORATION?

It means making a concrete contribution and striving for a **positive impact on Society and the Planet**. Benefit Corporations are required to draw up an impact report annually and to state what progress has been made towards the specific goals set out in the articles of association; they must also describe action taken and say what their future plans and commitments are.

### WHY DID WE DECIDE TO BECOME A BENEFIT CORPORATION?

Because we believe that our role as a company must not only have a business goal, but also contribute positively to society as a whole.

### OUR VOW

As a Benefit corporation, Sammontana aims to **operate successfully in order to benefit society and to act in a responsible, sustainable and transparent way that serves people, territories, the environment and other stakeholders**.

Although a company must pursue financial viability for its current and future health, this does not mean that its actions and activities cannot be underpinned by endeavours that will sustain the environment and society. Being a benefit corporation involves a commitment on a daily basis, but all of Sammontana's best efforts would be futile without the support and cooperation of everyone involved. We are fully aware that concrete results and true progress can only be achieved if we all strive together as a group.

SAMMONTANA  
È UNA SOCIETÀ  
BENEFIT

“ That's what we're made of.  
Heart and mind.  
History and future plans.  
Tradition and development.  
Daily work.

We make it our business to do business properly and that's how we intend to go on. ”

# Sammontana SUSTAINABILITY

Aspirazione dal:

## 2016

### • Voluntary agreement

Sammontana signs a voluntary agreement as part of the Italian national programme for environmental-footprint assessment with the Ministry of the Environment, undertaking to measure and reduce, whenever possible, the environmental footprint of its products

### • Methodological approach

In conjunction with Spinlife, a spin-off of the University of Padua

## 2017

### • Conscious-School Project

Over 2,000 primary schools involved in three years' teaching syllabus

### • Clean beaches

Over 50 Italian beaches cleaned up by Legambiente (Italian environmental association) & Sammontana

## 2018

### • Planning ahead

A special software programme predicts the environmental impact of the various available options

### • Environmentally-friendly beachfront resorts/cafés

Sammontana sale outlets selected on the basis of their environmental-sustainability credentials

- Highly "energy-efficient" fridges
- Offsetting gelato sold during the season

## 2019

### • Circularity index

Commitment to waste reduction, both in terms of raw materials and packaging

### • 100% Multipack containers in recycled paper

### • Places to be saved

Italia intatta (Untouched Italy) | 2019 Tour | Mario Tozzi

## 2020

### • Barattolino Delizie range & Barattolino Specialità range

Produced with a lid and tub in FSC®-certified cardboard.

*In 2020 Sammontana made the decision to dedicate its experience and expertise to the environmental cause and take concrete action for the furtherance of sustainability with a three-pronged approach*

### HEALTH & WELL-BEING

Human beings, their health, right to food, to food security, and satisfaction and well-being

### SUSTAINABLE SUPPLY CHAINS

Sourcing feedstock/materials from suppliers with sustainability certification. Abiding by the principle of interdependence throughout the value chain

### ENVIRONMENT

Reducing the environmental impact

## 2021

### • Barattolino Classici Range

Produced with a lid and tub in FSC®-certified cardboard.

- Sammontana renews the Agreement with the Italian Ministry for Ecological Transition extending it across the entire organisation

## 2022

### • Sorbettiera range

Produced with over 50% bio-circular plastic\*

*\*Bio-circular plastic: this means residue and waste of biogenic origin derived from farming activities in keeping with the mass-balance approach, a process which accurately traces the flow of bio-circular material. By sourcing bio-circular feedstock for the production of plastic instead of using fossil-derived plastic, we limit our impact on the environment.*

### • Regenerative Society Foundation

Sammontana enters the RSF as a founding member. The RSF is an organisation that unites the business world and the science community to accelerate the shift towards a completely regenerative society

### • Environmental impact of products

Sammontana studies the environmental impact of 42% of its gelato production

### • Renewable energy with Guarantee of Origin

Sammontana purchases 12% of its energy from renewable sources

## 2023/24

### • Emission offsetting

Since the year 2016, Sammontana has offset over 180,000 tonnes of CO<sub>2</sub>eq. for the Barattolino, Fruttiamo, Amando, Prima Ricetta & GreenGo ranges

### • Environmental impact of products

In 2023, Sammontana finished its studies on the environmental impact of all the gelato products

### • Renewable energy with Guarantee of Origin

Sammontana increases the amount of electricity it obtains from renewable sources, reaching about 20% in the year 2023. It expects to reach about 38% in 2024

### • Decarbonisation

Sammontana schedules activities which progressively reduce direct emissions of CO<sub>2</sub> eq. as measured and calculated

As from 2023, the Amando range becomes carbon compensated

The equivalent CO<sub>2</sub> emissions of the entire life cycle of the Amando line products are offset annually through the purchase of certified carbon credits, which finance projects to reduce and remove CO<sub>2</sub> in the atmosphere on a global scale. To calculate the equivalent CO<sub>2</sub> emissions generated in the entire life cycle of the Amando line products, Sammontana annually carries out a study following the LCA methodology (Life Cycle Analysis, ISO 14044 standard)

### • Supply chain of feedstock and materials

Sammontana keeps its commitment to source its supplies in an increasingly conscious manner, taking into account the social, economic and environmental impact

As from 2024, the Amando range vouches to promote sustainable farming practices across the almond supply chain
